**Physician/Authorized Signature**

Patient, Client and Billing information is requested for timely processing of this case. Medicare and other third party payors require that services be medically necessary for coverage, and generally do not cover routine screening tests.

Refer to policies published by your Medicare Administrative Contractor (MAC), CMS, or www.LabCorp.com/MedicareMedicalNecessity when ordering tests that are subject to ABN guidelines.

Symbols Legend  
 @ = Subject to Medicare medical necessity guidelines  
 % = Subject to Medicare frequency guidelines  
 # = Medicare deems investigational. Medicare does not pay for service it deems investigational.

**SPECIMEN LABEL INSTRUCTIONS:**

- 1.) Complete the requisition with all requested information.
- 2.) Remove the required number of labels from the front of this sheet.
- 3.) Place one (1) label on each specimen container (not on the lid).

PLEASE DISPOSE OF UNUSED LABELS.

## TEST COMBINATION/PANEL POLICY

LabCorp's policy is to provide physicians, in each instance, with the flexibility to choose appropriate tests to assure that the convenience of ordering test combinations/panels does not distance physicians who wish to order a test combination from making deliberate decisions regarding which tests are truly medically necessary. All the tests offered in test combinations/panels may be ordered individually using the LabCorp request form. LabCorp encourages clients to contact their local LabCorp representative or LabCorp location if the testing configurations shown here do not meet individual needs for any reason, or if some other combination of procedures is desired.

In an effort to keep our clients fully informed of the content, charges and coding of its test combinations/panels when billed to Medicare, we periodically send notices concerning customized test combination/panels, as well as information regarding patient fees for all LabCorp services. We also welcome the opportunity to provide, on request, additional information in connection with our testing services and the manner in which they are billed to physicians, health care plans, and patients.

The CPT code(s) listed here are in accordance with the current edition of Physicians' Current Procedural Terminology, a publication of the American Medical Association. CPT codes are provided here for the convenience of our clients; however, correct coding often varies from one carrier to another. Consequently, the codes presented here are intended as general guidelines and should not be used without confirming with the appropriate payor that their use is appropriate in each case. All laboratory procedures will be billed to third-party carriers (including Medicare and Medicaid) at fees billed to patients and in accordance with the specific CPT coding required by the carrier. Microbiology CPT code(s) for additional procedures such as susceptibility testing, identification, serotyping, etc., will be billed in addition to the primary codes when appropriate. LabCorp will process the specimen for a Microbiology test based on source.

MicrocytePLUS® Urine Cytology CPT Codes		
994	Urine Cytology Hematuria Profile	88108, 88313, 81003, 82232, 84156, 82043
For directing further evaluation of patients currently not monitored for TCC who present with hematuria or other signs of urinary tract or renal disease. (Cytodiagnostic Urinalysis Correlating Cytology [by concentration technique, includes Pap and Feulgen stain], Urine Dipstick Chemistry, $\beta$ 2 Microglobulin, Microalbumin, and Total Protein)		
974	$\beta$ 2 Microglobulin	82232
976	Total Protein	84156
977	Microalbumin	82043
VUID	Bladder Cancer FISH/Cytology Pathodiagnostic Profile	88112, if automated 88121, if manual 88120
For therapeutic monitoring of patients with a history of TCC and for initial diagnosis of patients presenting with hematuria with suspicion of TCC: Bladder Cancer FISH and Cytology (Pap and Feulgen stain), FISH and cytology read by pathologist (MD). Includes integrated cytomolecular diagnostic interpretation with clinical correlation		
VU3	Cytology Plus Monitoring Profile	88112
Cytology (Pap and Feulgen stain)		
K600D	Bladder Cancer FISH Pathodiagnostic Test	If automated 88121, if manual 88120
Bladder Cancer FISH, including diagnostic interpretation with clinical correlation by pathologist (MD)		
VU4D	Cytology Plus Profile/Bladder Cancer FISH Reflex-Pathologist	88112; If reflexed; automated 88121/manual 88120
VU3TC	Cytology Urine Technical Component	88112-TC
972	Feulgen Stain	88313-TC
